

AMENDMENTS TO THE SPECIFICATION

On page 10, please amend the paragraph beginning at line as follows:

In the preferred embodiment, each looseleaf page or sheet 44 is divided into a viewing window section 100 and a hinge section 102 having an anchor strip 104 and adjacent gutter section 106 facilitating both the mounting and turning of the individual pages 44. The viewing window section 100 is divided into transparent quarter panels formed from a plastic material and openable along the top edge forming four top opening viewing pockets 46. Each pocket includes a frontal transparent viewing window 104 and is bordered on three of its sides by weld lines ~~106~~ 107 where the plastic front surface is secured to a back lining 108. The back lining 108 of each pocket is preferably a non-woven material suitable for placement against the optical surface of the disc when inserted into the pocket to prevent scratching the optical surface.
